

DECLARATION OF STORAGE AND PROCESSING EXPIRATION DATE

Dear Sir, Dear Madam,

Based on the information of our pre-suppliers and evident experiences, it is hereby confirmed that all standard articles, supplied by us, reach an expiration date of **one year after manufacturing** of the article, solely under the following conditions:

Bottles:

Packed bottles need to be stored at dry and suitable places in between a tempered range of +10°C and + 30°C. Extreme and fast changes of temperature is not suitable for long term storage. Air moisture should be within a range of 70 – 80%. Higher or lower humidity might lead to insecure or instable packages on long term. Direct impact of sunlight (windows, glass roofs a.so) is causing quality losses and needs to be avoided. Pallet stacking is possible with tray pallets incl. corner protection 4 pallets max., without corner protection 2 pallets max, box pallets (2 pallets max.).

Note: Bottles must be prepared for processing 24 hrs before usage, i.e. transferred into the room conditions of the filling room, approx. +19 ± 3°C.

Caps:

Storing of caps is requiring the same conditions as those of bottles, room temperature, humidity a.so. Do not stack cap pallets of more than 1,5 m height more than two. Do not store flip top caps below +7°C ! Caps must be prepared for processing 24 hrs before, i.e. transferred into room conditions of the filling room (+19 ± 3°C). Flip top caps should not be processed below +16°C.

We do recommend FIFO procedures with all deliveries!

As long these conditions are fulfilled and provable given, our standard articles have an expiration date of **one year after their production**. In case, additional or different attributes are requested, please, inform our selling dept. before placing an order!

Remark: This is no warranty for filled or processed articles. These might require totally different conditions which need to be tested and approved by the buyer or processor.

In case you need more details or additional information, do not hesitate to contact our team.

i.A. Reinhard Baar
